Backend:

Node.js, Express.js, REST APIs, Firebase Authentication, JWT Authentication, Password Recovery Systems

Database & Cloud:

Firebase Firestore, Firebase Hosting

Real-Time & Integration:

WebSockets (Socket.io), Google Authentication

Tools:

Git, GitHub, VS Code, Figma

PROJECTS

JuanVote Ecosystem | Lead Full Stack Developer | 2025

- Led backend development for a voter education platform designed to help users evaluate candidates and make informed voting decisions through interactive gameplay.
- Collaborated with a 5-member capstone team and one additional developer to build a cross-platform ecosystem consisting of a Unity mobile application, React administrative dashboard, and public transparency portal.
- Designed and implemented backend architecture using Firebase, supporting authentication, user progress tracking, survey collection, and analytics.
- Developed secure authentication and authorization systems using Google Authentication and JWT-based access control.
- Built RESTful APIs and real-time communication services to support live voting analytics and

educational insights.

- Designed and optimized database structures managing 100+ gameplay and survey records collected during testing.
- Deployed and maintained application infrastructure using Firebase services.

PluSizeByChubynita Website | Frontend Developer | 2024

- Developed a responsive e-commerce website using HTML, CSS, and JavaScript.
- Built dynamic product displays and interactive user interfaces using custom DOM manipulation.
- Implemented responsive layouts using CSS Grid and Flexbox to ensure compatibility across desktop and mobile devices.
- Optimized website performance and user experience through efficient asset loading and front-end best practices.

EXPERIENCE

Red Cross Valenzuela City Chapter | Full Stack Developer Intern & IT support | June 2025 - Oct 2025

- Developed and deployed a full-stack company monitoring system used by staff to track partner organizations and manage health certificate renewals.
- Digitized spreadsheet-based workflows, reducing duplicate records and improving overall data accuracy across 50+ monitored companies.
- Implemented geospatial mapping functionality to visualize company locations and improve operational visibility.
- Built advanced search, filtering, and status-tracking features to quickly identify expired and expiring company certifications.
- Collaborated with organizational stakeholders to gather requirements and deliver production-ready functionality currently in use.

ACHIEVEMENTS

- 2nd Runner-Up, University of Makati I.T. Skills Olympics – Game Development Category
- Dean's Lister, 1st Semester, Academic Year 2022–2023
- Dean's Lister, 2nd Semester, Academic Year 2023–2024
- Dean's Lister, 1st Semester, Academic Year 2024–2025
- Dean's Lister, 2nd Semester, Academic Year 2024–2025
